

COPING WITH CARE: EMPOWERING OUR NEXT GENERATION

Virtual Webinar for Licensed Mental Health Professionals

This training is designed to empower communities, families, and mental health professionals with the vital knowledge, skills, and tools needed to effectively assist at-risk youth. Participants will deepen their understanding of serving at-risk populations and refine practical skills crucial for efficient intervention.

Participate in an illuminating training session aimed at enhancing your professional repertoire.

Learning Objectives:

- ✓ **Knowledge Acquisition:** Participants will understand the foundational concepts, theories, and principles related to serving at-risk populations.
- ✓ **Skill Development:** Participants will develop practical skills necessary to serve at-risk populations efficiently and effectively.

- ✓ **Problem-Solving:** Participants will be able to identify, assess, and solve problems encountered within the scope of at-risk populations.
- ✓ **Collaboration:** Participants will effectively collaborate and teamwork among participants to achieve common goals related to at-risk populations.
- ✓ **Application:** Participants will be equipped with the ability to apply their knowledge and skills in real-world scenarios.
